

Livingston's Globe Tomato

New for 1905.

For the past seven or eight years we have been working on this variety, our aim being to get something decidedly good along certain lines, notably in its distinctly different shape from all other varieties. We started with an elongated (from stem to blossom end) fruit—one as far removed from the flat shape as possible. We did not, however, lose sight, for a moment, of any of the other good points which have entered into the make-up of all our other varieties. Now we have in the **Livingston's Globe** an extra good all-round sort, of distinct globe shape, with quite a large percentage of elongated fruits. It is a very beautiful variety, and, on account of its shape, one that permits of a greater average number of slices to be taken from each fruit.

LIVINGSTON'S GLOBE TOMATO
Showing Distinctive Shape and Solidity of Fruit.
Packet (40 seeds) 20 cents.

In time of ripening we class it among the first earlies, being among the first to ripen fruit, both in our greenhouses as well as our field trials, along with many other varieties. The fruits are of large size, and a good marketable size is retained throughout the season; always smooth, of firm flesh, and has few blemishes; ripens evenly; color a fine glossy rose, tinged with purple, and without the slightest hint of yellow at any stage of ripening. An exceedingly productive variety, having plants with many short joints at which large clusters containing three to seven fruits are almost invariably formed, so that it can be truthfully stated the plants are literally loaded with fruit. It is a remarkably good keeper, none of the many varieties we grow surpassing it in this respect—not even the everlasting-keeping Peach varieties. In quality there is nothing more to be desired, being mild, pleasant and of delicate flavor; unsurpassed for slicing or to eat from the hand.

For greenhouse growing, or for early growing on stakes or trellises, which is now so much in vogue, it is second to none of the purple sorts with which we are acquainted; and we aim to try all promising varieties as they are offered.

First-class as a general field cropper. It is so firmly fixed in its characteristic features that it was difficult to discover any variation in our 1904 crops. Every grower who invests in a packet will find it a new variety, not one that has simply been given a new name, and will not be disappointed in it; the market gardener who buys several packets will be pleased and well repaid, as the beautiful and attractive globe-shaped fruits will find ready sale.

We bespeak for the **Livingston's Globe** a great future, for, in our judgment, it will at once become a popular variety with tomato growers of every class.

PRICE per Packet (40 seeds)—20c.; 3 packets, 50c.; 7 packets, \$1.00. We offer it in packets only (not in bulk) this season.

The Livingston Seed Company,
Tomato Specialists. Columbus, Ohio.

Mr. FRED WINDMILLER, Ohio,
a market gardener of large experience, says:

"Your New Globe Tomato should find its way into every garden in the country on account of its excellent table qualities—being, without exception, the best to eat from the hand or sliced of any that have come to my notice. It combines meatiness, scarcity of seed, convenient size, attractive shape and pleasing taste to such an extent that it ranks with fruit rather than vegetables. An excellent forcemeat, where its excellent quality will bring fancy prices."

Mr. L. C. SMITH, extensive grower of tomatoes for 20 years past:

After careful examination of a crop growing on our True Blue Seed Farm the past season, says: "You have a good thing, sure, in this variety. It is new, distinct, and will become popular with all classes of tomato growers. I will grow some of it the coming season."
